# Your phone system in the Cloud.

Combine your communications hardware and phone service in the cloud.

Jive Voice is a cloud-based PBX phone system that combines traditional PBX hardware and service into a single hosted solution. It offers all of the advanced features of an enterprise PBX system with over 80 Hosted VoIP features.

CUSTOM SCHEDULES

Custom schedules come standard with Jive Voice, allowing users to configure time-based call routing for open/closed business hours, holidays, and special events.

VISUAL DIAL PLAN EDITOR

Make real-time changes and map out call flows with wait times, auto attendants, voicemail boxes, sound clips, and schedules with Jive's visual Dial Plan Editor.

DETAILED CALL ANALYTICS

Create opportunities for more efficient use of resources, better training, and proper scheduling with Jive's customizable analytics and call reports.

No upgrade charges or service fees are necessary to enjoy our world-class service.

Visit jive.com/voice to learn more.
